Professional Summary

Highly motivated Full Stack Developer with **2+ years of experience** building scalable backend and frontend systems using **Django, React Native, and Next.js**. Skilled in designing RESTful APIs, optimizing databases and caching, and delivering high-performance, distributed web applications. Experienced in analytics-driven improvements and agile development. Proficient in **Java**, currently exploring **Go**, and distributed systems technologies such as **Kafka, Elasticsearch, DynamoDB, and Elasticache**. Demonstrates strong **enthusiasm to learn** and adapt quickly to emerging technologies.

Experience

Onsitego

Aug 2023 – Present

Software Developer

Bangalore, India

- Built an in-house **Lead Management System (LMS)** to streamline lead capture, assignment, and tracking.
- Designed a dynamic backend **payment gateway** with configurable routing and reusable classes.
- Developed a **Visit Management** feature for auditing, branding verification, and compliance checks.
- Developed a **referral system** that enhanced user engagement through structured, incentive-based workflows.
- Enhanced onboarding with features like **MyOrders** and **KYC**.
- Developed RESTful APIs and microservice-style endpoints in Django to support high-traffic workflows, improving response times and scalability.
- Implemented caching strategies and query/index optimizations (MySQL, Elasticache) to reduce server load and latency.
- Collaborated with cross-functional teams on feature design, code reviews, and troubleshooting production issues to maintain reliability.

Onsitego

Mar 2022 – Jul 2023

Software Developer Intern

Bangalore, India

- Developed and deployed **Over-the-Air (OTA) update** solutions for React Native apps, leveraging both **Xcode** (native iOS workflows) and **Microsoft CodePush** (JS bundle updates), enabling seamless updates without full store redeployment.
- Improved SEO performance and page load efficiency by implementing lazy loading, dynamic imports, and asset optimization, resulting in a nearly **2× improvement on desktop** and over **6× improvement on mobile** metrics.
- Integrated analytics and user behavior tools (**CleverTap, Segment, UXCam, Clarity, Branch**) to reduce abandonment rates from **90% to 30%**.

Core Contributions Across Both Roles at Onsitego

- Contributed to core services (insurance and repair) by enhancing functionality and app performance.
- Built features like **Address Management, Deep Linking, Customer Merging, and Slot Selection**.
- Optimized database queries and indexing to improve scalability and response times.
- Refactored redundant code, optimized algorithms, and reduced server load.
- Performed root cause analysis to resolve production defects and maintain reliability.

Technical Skills

Languages: Java, JavaScript, HTML/CSS (Go — learning)

Frameworks & Libraries: Django, ReactJS, React Native, Next.js

Databases: MySQL (query optimization, indexing)

Cloud & Infrastructure: AWS (familiar), Docker, CI/CD basics

Technologies & Tools: REST APIs, Elasticache, Elasticsearch (learning), Kafka (exploring), SQS, DynamoDB (familiarity), Over-the-Air (OTA) Updates (Xcode, Microsoft CodePush), **Git**

Analytics Tools: CleverTap, Segment, UXCam, Clarity, Branch

Core Competencies: Backend API design, Scalable Architecture, Debugging, SEO Optimization, Agile Development

Education

Lovely Professional University

Jul 2019 – Jul 2023

B.Tech. in Computer Science and Engineering (GPA: 8.37/10)

Punjab, India
