Professional Summary

Full Stack Developer with **2+ years of experience** in building and optimizing high-performance web and mobile applications using **React Native, Next.js, and Django**. Skilled in scalable architecture, RESTful API design, and delivering robust cross-platform experiences. Achieved measurable results including a **600% SEO improvement** and **60%+ drop-off reduction**. Experienced in analytics integration and Agile methodologies.

Experience

Onsitego

Aug 2023 – Present

Software Developer Engineer

Bangalore, India

- Built an in-house **Lead Management System (LMS)** to streamline lead capture, assignment, and tracking.
- Designed a dynamic backend **payment gateway** with configurable routing and reusable classes.
- Developed a **Visit Management** feature for auditing, branding verification, and compliance checks.
- Implemented a **gamified referral system**, boosting engagement with incentive-based referrals.
- Enhanced onboarding with features like **MyOrders** and **KYC**.

Onsitego

Mar 2022 – Jul 2023

Software Developer Engineer Intern

Bangalore, India

- Developed and deployed **Over-the-Air (OTA) update** solutions for React Native apps, leveraging both **Xcode** (native iOS workflows) and **Microsoft CodePush** (JS bundle updates), enabling seamless updates without full store redeployment.
- Boosted SEO performance by implementing lazy loading, dynamic imports, and asset cleanup (**183% desktop, 620% mobile** improvements).
- Integrated analytics and user behavior tools (**CleverTap, Segment, UXCam, Clarity, Branch**) to reduce abandonment rates from **90% to 30%**.

Core Contributions Across Both Roles at Onsitego

- Contributed to core services (insurance and repair) by enhancing functionality and app performance.
- Built features like **Address Management, Deep Linking, Customer Merging, and Slot Selection**.
- Optimized database queries and indexing to improve scalability and response times.
- Refactored redundant code, optimized algorithms, and reduced server load.
- Performed root cause analysis to resolve production defects and maintain reliability.

Technical Skills

Languages: JavaScript, Java, HTML/CSS

Frameworks & Libraries: ReactJS, React Native, Next.js, Django

Databases: MySQL

Technologies: REST APIs, Over-the-Air (OTA) Updates (Xcode, Microsoft CodePush)

Analytics Tools: CleverTap, Segment, UXCam, Clarity, Branch

Core Competencies: Full Stack Development, Scalable Architecture, Debugging, SEO Optimization, Agile Development

Education

Lovely Professional University

Jul 2019 – Jul 2023

B.Tech. in Computer Science and Engineering (GPA: 8.37/10)

Punjab, India

Hobbies & Interests

Enjoys hiking, traveling, cooking, and music.
